Auszug aus Grace' Brief

First of all, I would like to express my gratitude for allowing me to home stay in your family. That will be my honor. I consider myself an open-minded and sociable person; I always like to talk to others if there are any things happened to them. I'll also find someone to share my emotions through conversation, then we all will recovery quickly. I make friends easily, so I'm sure that we can really get along well in a short period of time. Adaptable & flexible are other important trait of mine. My Parents always let me do things by myself, including choosing dancing or music in elementary school; studying away from home to US, etc. I have made up many important decisions of myself, and this AYUSA program, is one of them too.

I realized that the competition I'm facing in the future is not only in our country or Chinese world, but in the global world, It's different from my parents generation. Now students should be prepared to be an international persons. The first step to achieve this is obviously language. Thanks my parents. They give me enough supporting. I could learn Spanish and English in local environment. That made me to learn not only language, but also life experience. The world is smaller and smaller. We need to understand each other through well communication. Different countries with different cultures and customs all need to be understand through language. I have a dream.

Irina, Dolgeprudniy/Rusland

Schüler

Nationalität: Russisch

Irina lebt mit ihrer Mutter sowie einer kleinen Schwester (4) in Moskau. Ihre Mutter ist Ökonomin. Später möchte Irina gern Schriftstellerin werden.

Irinas Brief

Hello, my name is Irina. I'm very happy I can take part in student exchange. I have already experienced live and study abroad, and it was very joyful and interesting. I was enjoying my friendship with students from other countries, as I studied in international school. I hope my study time in Germany will be as nice and effective as in Austria. I like connect with people, but sometimes it is rather hard. I love spend time with my friends, go walking, doing projects and have fun together.

In addition, I find myself as creative person. I am capable and prompt, and I like to help others and solve the problems. I would be glad to take some housework, because I used to help my mother. However, I would like also find time for my passions for drawing, playing the piano, and reading. I hope I will live in harmony with my host family, and I cannot wait to have an acquaintance.
